

SUPER ABRASIVES ENGINEERING PTE LTD

Since 1986, Super Abrasives Engineering Pte Ltd has been working with leading European machine and tool manufacturers to bring the best of precision machining technology to the ASEAN region.

Today we provide a complete range of precision machine tools for the aerospace, automotive, precision engineering, mould and die, semi-conductor and R&D industries. In addition, our in-house R&D centre supports & provides optimum solutions to meet all your machining needs.

CINCINATI TECHNOLOGIES

Cincinnati • Giddings & Lewis • Automation & Test

WINTER
diamond tools
CBN tools

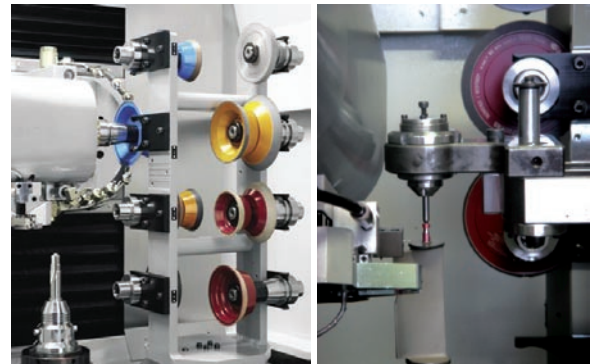

CEMECON
Coatings, Technology & Process

SCHUMACHER
Thread Cutting Tools Technology

Our range of products & services offers versatile, flexible and innovative concepts for the economic machining of complex and highly precise parts and components in the aerospace industry.

- Diamond & CBN grinding wheels for profile & creep feed grinding applications for Inconel, Titanium hard coatings etc.
- Multi-axis CNC Tool & Cutter Grinding Machines for precision machining of aircraft components such as vanes, blades, splines etc.
- Contour Tape Layering Machines for Composite Fabrication Jobs.
- High Precision Machining of Composite Parts.
- Surface & Profile grinding machines
- High performance advanced coating technologies for increased machineability of cutting tools & components.
